SL 8000

Portable Steam Cleaning

Continuous Fill Steamer

The Victor SL 8000 has a continuous fill facility allowing the operator to clean without a loss in steam pressure and without having to de-pressurise the boiler to refill. This provides an almost unlimited time in use.

Integrated Vacuum

The SL 8000 includes a vacuum for additional cleaning capability to leave surfaces dry and free from dirt.

HEPA filtration

The SL 8000 includes a HEPA filter on the vacuum to protect the operator and the environment from fine dust and bacteria.

Three Vacuum Settings

The vacuum has 3 power settings that let the operator dictate the suction but more importantly the noise level depending on the environment in which the machine is used.

Steam helps Sanitise

The steam is released at 145°C which provides a sanitising effect on the surface it cleans. It also helps remove dirt and grease from surfaces without the use of cleaning agents.

Full Range of Accessories

The SL 8000 comes complete with a full range of accessories that allow you to clean almost anywhere.

A photograph of the Victor SL 8000 steam cleaner. It is a white and blue portable unit with a black flexible hose and a black floor nozzle. The unit is shown from a three-quarter perspective, highlighting its compact design and the integrated vacuum system.

The SL 8000 from Victor offers superb portable steam cleaning complete with vacuumation for complete dirt and water removal leaving surfaces clean, dry and sanitised.

Technical Data

Product Code	V-H9810
Voltage (V)	230
Motor Power (Watts)	1000
Steam Pressure (bar)	4
Boiler Capacity (litres)	1.5
Boiler fill resevoir capacity (litres)	1.5
Recovery Tank Capacity (litres)	2.5
Cable Length (m)	5

The SL 8000 is the ideal solution for the cleaning of a wide variety of areas including washrooms, kitchens, carpets and upholstery. The steam helps to sanitise the cleaned surfaces and the vacuum helps remove dirt and water.

As you would expect, the SL 8000 comes complete with a range of accessories allowing you to clean everything from floors to walls to windows and grouting with ease.

The continuous fill feature that automatically fills the boiler from a separate reservoir means that cleaning can continue without having to stop and depressurize the boiler to refill it.
